

RADIATION PORTAL MONITORS PM5000B series

DETECTION OF RADIOACTIVE MATERIALS
IN AUTOMATIC MODE

Purpose

Radiation Portal Monitors (RPMs) PM5000B series are highly sensitive fixed-installation systems designed to automatically detect illicit trafficking of nuclear and other radioactive materials.

Designed to meet ANSI N42.35-2016, IEC 62244 requirements. The monitors correspond to the IEC 61000-6-2:2016, IEC 61000-6-3:2011 and IEC 61326-1:2012 electro compatibility standards.

RPMs have modular design and may have one-pillar or two-pillar configurations, adaptable height and width according to customer requirements. Monitors can be equipped with video monitoring system.
